Team Final Project

- May 27
 - Team 3: 바스후, 이윤성, 정수민, 진민아, 하준희
 - Team 4: 강예준, 김경민, 뇌양, 이예인, 임승민, 정도영
 - Team 8: 김준일, 유우흔, 이상훈, 이정은, 하선재, 한용현
 - Team 9: 김민재, 김희윤, 유만청, 이경민, 이유진, 이재윤
 - Team 11: 김재원, 방주원, 서예정, 유유미, 윤다경, 이지수
- June 10
 - Team 1: 권성호, 등서항, 유승민, 이규원, 이수연, 장귀나
 - Team 6: 김진무, 안희수, 자흐로, 정철희, 최정호, 한석화
 - Team 7: 성시운, 신찬민, 유탁용, 진재현, 최시현, 최철원
 - Team 10: 권정현, 김서연, 성일문, 지유민, 최이삭
- Prepare for a **24-minute** (max) presentation!
 - Either “discussion-oriented” or “presentation-oriented” format is fine.
- 대본을 사용하지 않을 경우 가점! → 같은 team에 속해도 개인별로 점수가 달라짐

Team Final Project

- For this team assignment, your team will...
 - 1) Choose a case relating to OB issue(s) in a real organizational/social setting
 - 2) Gather information on the focal case in a creative and comprehensive manner
 - 3) Thoroughly describe and critically analyze/evaluate the case, based on the knowledge learned from this “Organizational Behavior” course
 - 4) Propose specific recommendations to improve the issue(s) in the case

Conflict and Team Outcomes

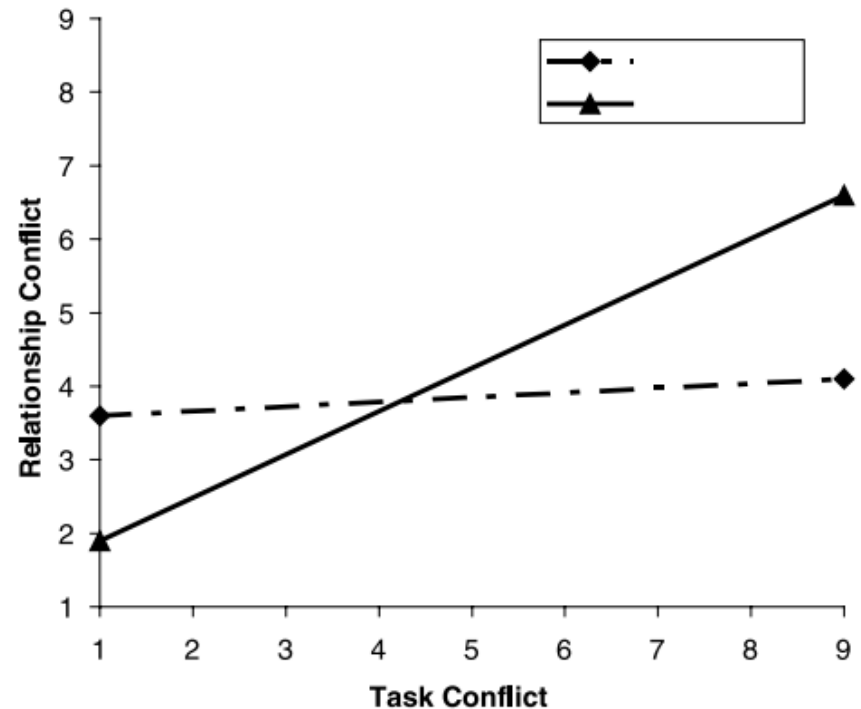

- de Wit et al. (2012): meta-analysis
 - What is the meaning of the very weak “task conflict – group performance” relationship ($\rho = -.01$)?
 - In some situations, the relationship is positive, whereas in other situations, it is negative → thus, moderators are likely to matter!
 - When can task conflict be functional?

Meta-Analysis Results for Group Performance

Predictor	<i>k</i>	<i>N</i>	Mean $\bar{r}$	Mean $\hat{\rho}$
Task conflict	95	7,201	-.01	-.01
Relationship conflict	80	5,369	-.15	-.16
Process conflict	24	1,752	-.13	-.15

Relation Between Conflicts

- What about the relationship between conflict types?
 - The relationship between task conflict and relationship conflict is positive (the correlation is around .50, as reported in many studies).
 - Why does task conflict lead to relationship conflict?
 - Misattribution process: When the attribution process points toward personal attack, task conflict triggers relationship conflict through a process of biased information processing.
 - When group members trust each other, the misattribution process is likely to be weakened.

Source: Peterson & Behfar (2003)

Trust (Mayer et al., 1995; Colquitt et al., 2007)

Bases of trust	Survey items (Mayer & Davis, 1999)	Synonyms
<u>Ability</u> The knowledge and skills needed to do a specific job along with the interpersonal skills and general wisdom needed to succeed in an organization	1. [The trustee] is very capable of performing [the trustee's] job. 2. [The trustee] is known to be successful at the things [the trustee] tries to do. 3. [The trustee] has much knowledge about the work that needs done. 4. [The trustee] has specialized capabilities that can increase our performance.	Competence, Perceived expertise
<u>Integrity</u> The extent to which a trustee is believed to adhere to a set of principles that the trustor finds acceptable	1. [The trustee] has a strong sense of justice. 2. I never have to wonder whether [the trustee] will stick to [the trustee's] word. 3. [The trustee] tries hard to be fair in dealing with others. 4. [The trustee's] actions and behaviors are not very consistent. (R) 5. Sound principles seem to guide [the trustee's] behavior.	Fairness, Justice, Consistency, Promise fulfillment
<u>Benevolence</u> The extent to which a trustee is believed to want to do good for the trustor, aside from an egocentric profit motive	1. [The trustee] is very concerned with my welfare. 2. My needs and desires are very important to [the trustee]. 3. [The trustee] would not knowingly do anything to hurt me. 4. [The trustee] really looks out for what is important to me. 5. [The trustee] will go out of [the trustee's] way to help me.	Loyalty, Caring, Supportiveness

Conflict Management

- Groups that resolve conflicts successfully discuss differences of opinion openly.
 - The most disruptive conflicts are those that are never addressed directly.
 - An open discussion makes it much easier to develop a shared perception of the problems at hand; it also allows groups to work toward a mutually acceptable solution.
 - Van Quaquebeke & Felps (2018)
 - Many of us have a nasty habit of listening to respond rather than listening to understand. We focus on what we are going to say next instead of really trying to fully understand what the other person is saying.

Conflict Management

- Have opposing groups pick parts of the solution that are most important to them and then focus on how each side can get its top needs satisfied.
 - Neither side may get exactly what it wants, but each side will achieve the most important parts of its agenda.
- Managers need to emphasize shared interests [superordinate goals, group identity] in resolving conflicts.
 - This way, subgroups that disagree with one another don't become too entrenched in their points of view and start to take the conflicts personally.
 - Emphasizing inter-group competition (ingroup vs. outgroup)

Organizational Change I

Organizational Behavior 06

May 13, 2026

World Keeps Changing...

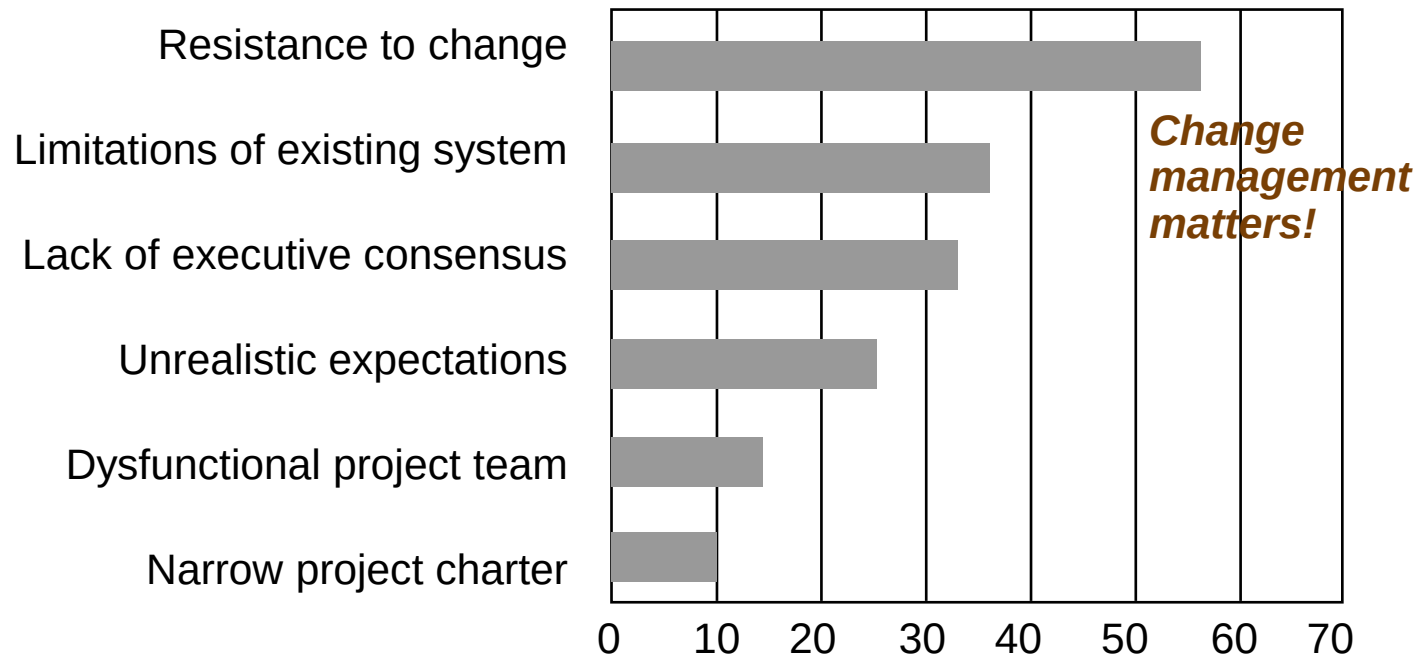

- Forces for change: What environmental forces stimulate change?
 1. Nature of the workforce
 - More cultural diversity
 - Aging population
 2. Technology
 - Faster, cheaper, and more mobile, handheld devices
 - Artificial intelligence
 3. Competition
 - Global competitors
 - Increased government regulation of commerce
 4. Social trends
 - Increased environmental awareness
 - Online vs. In-person

CHANGE OR DIE

*“Your life does not get better by chance.
It gets better by change.”*

Change Issues = Major Barrier to Success

“Dear CEO, what do you see as the major barriers or challenges to your success...?”

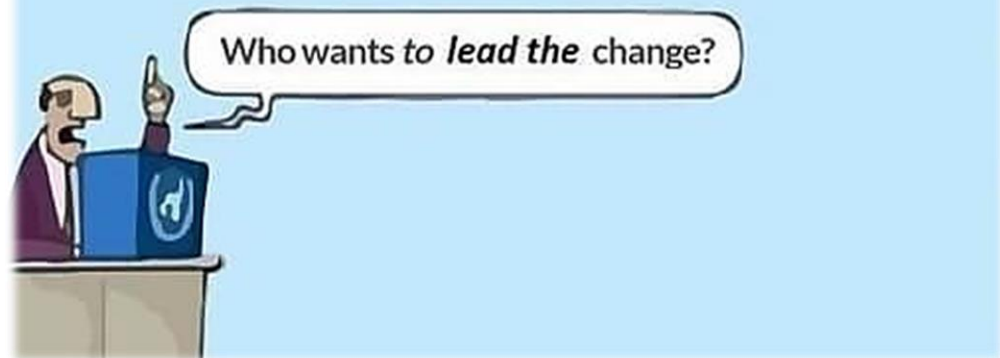

Gartner Group Research; 100 CEOs

Resistance to Change

- Our egos are fragile, and we often see change as threatening...

Resistance to Change

- Individual sources of resistance
- Organizational sources of resistance

Resistance to Change

- Individual sources of resistance
 - Habit
 - To cope with life's complexities, we rely on habits or programmed responses. But when confronted with change, this tendency to respond in our accustomed ways becomes a source of resistance.
 - Security
 - People with a high need for security are likely to resist change because it threatens their feelings of safety (e.g., job security).
 - Fear of the unknown
 - Change substitutes ambiguity and uncertainty for the unknown.
 - Selective information processing [confirmation bias]
 - Individuals are guilty of selectively processing information in order to keep their perceptions intact. They hear what they want to hear, and they ignore information that challenges the world they have created.

Resistance to Change

- Organizational sources of resistance
 - Structural inertia
 - Organizations have built-in mechanisms (e.g., selection processes and formalized regulations) to produce stability. When an organization is confronted with change, this structural inertia acts as a counterbalance to sustain stability.
 - Limited focus of change
 - Organizations consist of a number of interdependent subsystems. One can't be changed without affecting the others. So limited changes in subsystems tend to be nullified by the larger system.
 - Threat to established power relationships
 - Any redistribution of decision making authority can threaten long-established power relationships within the organization.

Politics of Change

- Because change threatens the status quo, it inherently implies political activity.
- Politics suggests that the impulse to change is more likely to come from:
 - Outside change agents
 - Employees new to the organization who have less invested in the status quo
 - Managers slightly removed from the main power structure
- Managers who have spent their entire careers with a single organization and eventually achieve a senior position in the hierarchy are often major barriers to change.
 - However, when forced to introduce change, these long-time power holders tend to implement incremental, not radical, changes.
 - This explains why boards of directors that recognize the necessity for rapid and radical change frequently turn to outside candidates for new leadership.

Next Week (1)

- Team Presentation: “What can we learn from the case?”
 - Presentation + Class discussion: 45 minutes
 - Presenting team must post their slides **by 10 am on the presentation day** (“Presenting Team’s Slides” in “토론” menu on e-class)
- In the presentation, discussion questions should highlight the followings:
 - Main issues of the case
 - Your own creative ideas/questions that you think need to be addressed to fully understand the issues of the case
 - Your responses to non-presenting students’ comments and questions
 - Managerial/practical implications related to the case
- Peer evaluation regarding team presentation will be conducted at the end of the session (presenters only)
 - Presenting team members will evaluate each team member’s contribution to the presentation

Next Week (2)

- More on organizational change
